PROJECTS

DialectTalk

- The app was able to translate to and from the eight most common dialects in the Philippines.
- Implemented a platform that allowed the creation and management of custom-made lessons and modules.
- Created an automated way to create and check for quizzes within the application.

RadiantHub

- Designed and implemented a real-time match schedule platform for Valorant, using RESTful APIs to fetch and filter match data by region.
- Developed automated data fetching and error handling for seamless integration of match schedules into the application interface.
- Engineered Proplayer information modules, displaying player stats, rankings, and profiles to enrich user engagement.
